

Transfer to HU

Temporary residence permit holders

You can find confirmation of your nationality group, conditions and requirements for the Temporary residence permit (REF) for study under the Pathfinder link on our website.

You currently have a Dutch residence permit for study purposes

If you have residence for study purposes at another Dutch university and you wish to transfer to our university HU will need to send a new application to the Dutch Immigration to advise them of your transfer to our university.

Once you have cancelled your enrolment officially at your current university they (sponsor) are obliged to inform the IND that you are no longer registered as a student with them. It is therefore very important you are aware of our application procedures and deadline dates to ensure continuation of your residence status for study.

Before we can send the visa application to the Dutch Immigration we will need a complete 'visa' application from you; including an the additional information form (available on our website) giving explanation of what and where you have studied so far in the Netherlands. You will need to upload this form together with the financial and immigration documents requested in our online International student application process Osiris.
